

STUDENT FACILITIES

Bidholi & Kandoli Campuses

Cafeteria / Restaurant

Food and refreshment facilities are readily available on campus. The main cafeteria is centrally located, while both Bidholi and Kandoli have dedicated food court buildings. Smaller food and beverage outlets are also available at convenient campus locations.

Bookstore / Library & Learning Resources

The library is presented as a major learning resource for students, with extensive physical book collections, reading areas, study tables and seating. The facility provides quiet spaces for individual study. Students can also access e-books store and digital learning resources through the library's electronic collections.

Student learning support Extensive book collection • Reading areas • Study rooms / study spaces • E-books store & digital resources • Quiet study environment

**Central library — stacks
and study tables**

Social Room – “Buzz”

Both campuses provide a dedicated social space known as “Buzz”. It combines lounge-style seating with recreational space and supports informal student interaction between classes. The documented facility includes comfortable seating and a table-tennis area.

Student engagement Informal interaction • Lounge seating • Recreational space • Table tennis • Collaborative social environment

Support Centre for Minority Groups

The Support Centre for Minority Groups is a clearly identified student support facility near a main campus corridor. It provides a dedicated space where students from minority communities can seek guidance, counselling or a supportive conversation on academic or other concerns.

*Support Centre for Minorities

It's also backed by a few university-wide committees

- An Anti-Discrimination Committee, covering caste, religion, gender, disability and similar grounds.
- An Internal Complaints Committee for sexual harassment cases.
- A Committee for Students with Disabilities.
- A Grievance Redressal Mechanism

Religious Facilities

UPES provides spaces that support students' personal reflection and prayer. The documented facilities include a small campus temple in a landscaped setting and a separate Prayer Room along a quieter corridor. The Prayer Room is described as open to students irrespective of faith who wish to have a quiet space for prayer or reflection.

Reflection & well-being Campus temple • Prayer Room • Quiet space for reflection and prayer
• Inclusive access

Academic, Learning & Research Facilities

Classrooms are ICT-enabled and mostly run off smart boards these days. Beyond that there are proper labs, workshops, design studios and a few innovation centres for students working on more hands-on projects. Bigger sessions — guest lectures, hybrid events — happen in the seminar halls and auditoriums, which come with decent AV support.

Smart Classroom

Engineering workshop / CNC lab

Residential Life

Hostels at both campuses put total capacity at around 3,200 students. Each has dining halls, common rooms and the usual mix of Wi-Fi, power backup and walkways connecting everything.

Utilities

Behind the scenes, power runs off an 11 kV network with its own substation, backed by generators and UPS. Water comes from treatment plants at both campuses (six bore wells feed them, plus rainwater harvesting), and there's a 650 KLD sewage plant that reuses treated water rather than just discharging it.

Rainwater Harvesting

Energy station

Safety & Security

Around 250 CCTV cameras feed into a central control room that's staffed round the clock. There's a fire hydrant network with automatic detection, plus the usual access control and visitor sign-in at the gates.

Central CCTV monitoring room

Control & Emergency Response Centre

Healthcare

Both campuses run an infirmary that's open around the clock, with an ambulance on standby. Security staff go through first-aid, AED and CPR training, and there are drills for handling emergencies and biomedical waste properly.

Sports & Fitness

At UPES, we believe that sports are not just activities but powerful platforms for fostering resilience, leadership, and teamwork. Our sports program is designed to inspire students to push boundaries, discover their true potential, and embrace the spirit of sportsmanship.

Synthetic Basketball Courts

Table Tennis

Football

Green Campus

UPES has gone plastic-free, and the grounds are landscaped with a fair amount of native planting. Rainwater harvesting and treated-water reuse cut down on waste, and there's a proper system for segregating and handling it too.

Plastic free Campus

Green Campus

Creche

UPES provides a dedicated creche facility at the Bidholi Campus to support the needs of young children. The facility provides a designated and child-friendly space within the campus, contributing to a more supportive and inclusive institutional environment for students and staff with young children.
